SUMMARY

Senior iOS Engineer with 6+ years building and shipping production apps, from multi-million-user platforms to complete products delivered solo end to end. Expert in Swift, SwiftUI, UIKit, and modern concurrency, with deep experience architecting MVVM/Coordinator codebases, custom networking layers, and real-time and payment integrations. Proven track record leading iOS teams, raising code quality, and taking apps from architecture through App Store release. Master's background in information system security.

EXPERIENCE

Senior iOS Engineer

Ziff Davis - Everyday Health Group

📅 Jun 2024 - Present 📍 Montreal, Canada (Remote)

- Led end-to-end development of a personalized checklist feature that analyzes user task completion patterns and pregnancy phase to surface contextual suggestions, with background processing and cross-functional delivery on schedule
- Expanded global reach by launching Community tab for international locales, driving a 5% increase in daily active users from outside the US
- Resolved high-impact iOS bugs, boosting crash-free sessions by 0.2% and elevating overall user satisfaction across a multi-million user base
- Extended a custom HTML rendering pipeline, improving how article content and attributes are parsed and translated into native UIKit components for high-fidelity, performant content presentation

Senior iOS Engineer (Contract)

VIN.Meet

📅 Oct 2023 - Dec 2025 📍 Dubai, UAE (Remote)

- Solo-built and shipped a social sports-networking app to the App Store, owning architecture through release across 14 modules and 55+ screens
- Set SwiftUI, MVVM, and async/await as the new standard in a hybrid UIKit/RxSwift codebase with a 7-coordinator navigation architecture
- Engineered a custom Alamofire networking layer with token injection and automatic session refresh on expiry
- Integrated real-time Socket.IO chat, Stripe and Apple Pay payments, HealthKit, and Firebase/AppsFlyer analytics and deep linking

Mid Level iOS Engineer

Savoir-Faire Linux

📅 Oct 2022 - Nov 2023 📍 Montreal, Canada

- Built comprehensive unit testing suite ensuring thorough coverage of critical app functionality, reducing manual testing time by 20%
- Systematically refactored legacy Objective-C modules to Swift, carefully preserving existing functionality while improving code maintainability
- Debugged and resolved performance bottlenecks using Instruments, fixing memory leaks and optimizing app responsiveness across system layers
- Contributed to open-source Jami codebase, collaborating with distributed contributors across platforms on a privacy-focused communications app

SKILLS

Languages: Swift, Objective-C

Frameworks: SwiftUI, UIKit, Combine, Swift Concurrency, Core Data, MapKit, RxSwift

Architecture: MVVM, MVVM-C, Clean Architecture, Coordinators, SPM Modularization

Networking & Data: URLSession, Alamofire, Socket.IO, Realm, CloudKit

Tools & CI/CD: Xcode, Git, Fastlane, GitHub Actions, Firebase, Instruments, TestFlight

Testing: XCTest (Unit & UI), Crashlytics, Sentry

EDUCATION

Master of Information System Security

Concordia University

📅 2022 - 2025

📍 Montreal, Canada

- Published research paper: "An Empirical Study on Learning Models and Data Augmentation for IoT Anomaly Detection" at IEEE CNS 2024

Bachelor of Computer Science

Amirkabir University of Technology (Tehran Polytechnic)

📅 2017 - 2022

📍 Tehran, Iran

Senior iOS Engineer (Freelance)

Mesh AI

📅 Mar 2022 - Oct 2022 📍 Remote

- Improved the Firebase crash-free rate by 20% within 90 days on a clinician-facing healthcare app by profiling and resolving stability issues across the codebase
- Developed new features that streamlined user navigation and core functionality, gathering and translating product requirements into technical specifications
- Worked directly with clinicians to understand workflows and translate domain-specific requirements into mobile features with minimal back-and-forth

iOS Team Lead

EBCOM • Subsidiary of IR-MCI, Iran's largest mobile operator

📅 Apr 2020 - Jul 2022 📍 Tehran, Iran

- Led the iOS team across an 8M user consumer app, promoted from engineer to lead within 9 months
- Drove a 1.7% KPI conversion rate improvement collaborating with product and design on core UI features
- Architected a wallet framework SDK adopted by external partners for in-app payment integration
- Developed a custom-built network system using RxSwift and Alamofire, accelerating team development speed by 20%
- Designed and implemented custom UI experiences using Core Graphics and Core Animation, including Bézier path animations, interactive charts, and onboarding flows that elevated visual polish across the app

Junior iOS Engineer (Freelance)

Boonoob

📅 Aug 2020 - Jan 2021 📍 Remote

- Built an in-app chatroom with MessageKit enabling post-match messaging, lifting user retention by 15%
- Wrote a Coordinator class that standardized navigation transitions across the codebase for the iOS team
- Designed an animated onboarding flow and in-app tutorials that improved first-run engagement

Junior iOS Engineer (Internship)

Carpino

📅 Sep 2019 - Mar 2020 📍 Tehran, Iran

- Built adaptive Auto Layout UI with smooth animations for the passenger app of Iran's third-largest ride-hailing platform
- Refactored similar view controllers into a shared base class, speeding up team development by 10%

ACHIEVEMENTS

Silver Medal

WorldSkills Asia Mobile App Development

📅 2021

VOLUNTEER WORK

Vice-President & Mobile App Team Lead

Hexploit Alliance — AthackCTF

📅 Jul 2023 - Mar 2025

PROJECTS

Quebec Firefighters

ConUHacks IX — SAP Challenge Winner

📅 2025

- Multiplatform SwiftUI app (iOS, iPadOS, macOS) with MapKit, Swift Charts, and URLSession for real-time firefighter dispatch coordination
